

Accessibility Audit Worksheet

Document Owner: Pawan Kushwah

Date: September 15, 2026

Target Application: Amazon.in Web & Mobile Interface

Summary of Audit Findings

This document details the accessibility issues identified during the audit, including invalid ARIA roles, insufficient touch target sizes, and missing video captions, mapped against the WCAG guidelines.

Issue ID	Page / Component	WCAG Reference	Evidence File	Severity	User Impact	Recommended Fix	Owner	Status
WEB-001	Amazon Header / App Banner Close Button	4.1.2 Name, Role, Value	WhatsApp Image 2026-09-15 at 1.34.43 PM.jpg 	High	Screen reader users cannot identify or interact properly with the close button because role="close" is not a valid ARIA role.	Replace role="close" with a standard HTML <button> element or set role="button" along with a proper aria-label="Close banner".	Pawan Kushwah	Open
WEB-002	Amazon Mobile Home / Sponsored Ad Tile	2.5.5 / 2.5.8 Target Size (Minimum)	WhatsApp Image 2026-09-15 at 1.35.07 PM.jpg	Medium	Users with motor impairments or small touchscreens	Increase the touch target area padding to at	Pawan Kushwah	Open

Issue ID	Page / Component	WCAG Reference	Evidence File	Severity	User Impact	Recommended Fix	Owner	Status
					Users struggle to tap small controls like "Sponsored" feedback links due to insufficient target size and spacing.	At least 24x24px (or 44x44px for WCAG AAA) and ensure adequate spacing around active targets.		
WEB-003	Amazon Home / Video Player Component	1.2.2 Captions (Prerecorded)	WhatsApp Image 2026-09-15 at 1.38.35 PM.jpg 	High	Deaf or hard-of-hearing users cannot understand and spoken content in promotional videos because no caption track is provided.	Add a <track kind="captions" src="..." srclang="en" label="English"> element inside the <video> element with accurate captions.	Pawan Kushwah	Open

Detailed Remediation Instructions

- WEB-001 (ARIA Roles):** Valid ARIA roles are strictly enforced by screen readers. Custom

values such as `role="close"` are ignored or misread. Convert the element to `<button class="..." aria-label="Close"></button>`.

- **WEB-002 (Touch Target Size):** Ensure touch controls meet minimum dimensions (at least 24x24 CSS pixels) to prevent accidental taps and improve accessibility on handheld mobile screens.
- **WEB-003 (Video Captions):** All pre-recorded audio/video media must include synchronized text tracks using standard .vtt caption files.
